RUDOLPH J. WEINMANN, Practicing Attorney,
Attorney for the Board of Administrators.

At the regular monthly meeting of the Board of Administrators of Charity Hospital of Louisiana at New Orleans held January 29th, 1946, the following resolution was unanimously adopted:

WHEREAS, in the passing of Mr. John X. Wegmann on December 10, 1945, the Board of Administrators of Charity Hospital of Louisiana at New Orleans has been deprived of a faithful member and a conscientious worker.

Active in business, civic, fraternal and religious affairs, he supplied leadership and aid for innumerable movements. His broad experience, good judgment and wise counsel proved valuable to the work of the Board of Administrators and he won the respect of all with whom he was brought in contact.

Mindful of his constructive work on behalf of the Charity Hospital, the Board of Administrators gratefully records its appreciation of him by adopting the following resolution:

RESOLVED that the members of the Board of Administrators of Charity Hospital of Louisiana at New Orleans attest to the inspiration and support which Mr. Wegmann brought to the deliberations of the Board and the Committees upon which he so faithfully served; and

RESOLVED FURTHER that this resolution be spread upon the Minutes of this Board, and that a copy be sent to Mr. Wegmann's family as a testimonial of our sincere appreciation of his usefulness and our keen sense of loss and profound sorrow upon his passing.

HOSPITAL DEPARTMENTAL STAFFS

Year Closing June 30, 1946

ADMINISTRATIVE DEPARTMENT

Form of Gift or Bequest

....

I give to the Board of Administrators of the Charity Hospital
of Louisiana at New Orleans the sum of

FIVE HUNDRED DOLLARS

to be added to the Children's Bed Endowment Fund.

.....
Full Name

.....
Date

.....
Address

Resolution unanimously adopted by the Board of Administrators at meeting of June 22nd, 1942:

WHEREAS, The care and comfort of the little afflicted children often times requires some form of amusement, entertainment or special services, not otherwise provided for,

THEREFORE, BE IT RESOLVED, That a fund be established whereby gifts or bequests to this fund to be designated as the *Children's Bed Endowment Fund* be accepted upon the following conditions, to-wit: That the principal be set aside unimpaired in perpetuity, and same be invested in high grade securities, and the income therefrom be dedicated and used exclusively for the care and comfort of the afflicted children receiving treatment in this hospital. Furthermore, a suitable tablet be placed in the Children's Ward, with the name of the donor and date of gift inscribed thereon.

JOINT REPORT OF THE VICE-PRESIDENT AND THE DIRECTOR

July 1st, 1946

HIS EXCELLENCY, JAMES H. DAVIS,
Governor of the State of Louisiana
Ex-officio President
Board of Administrators
Charity Hospital of Louisiana
New Orleans, Louisiana

HONORABLE ROBERT L. PETTIT, Director
Department of Institutions
Baton Rouge, Louisiana

Gentlemen:

The Vice-President of the Board of Administrators and the Director of the Charity Hospital of Louisiana at New Orleans submit the following report of the activities of the Hospital covering the period from July 1, 1945 to June 30, 1946, inclusive.

Mr. Walker Saussy resigned effective March 26, 1946.
Mr. John X. Wegmann died December 10, 1945.

Dr. Arthur Nesbit Houston was appointed January 1, 1946, and Mr. Malcolm L. Monroe was appointed on March 21, 1946.

Board
of
Administrators

The Board of Administrators, at its annual meeting held July 23, 1946, re-elected Mr. Louis G. Riecke as Vice President of the Board. Mr. Riecke announced the appointment of the following standing committees:

Finance Committee:

Mr. F. S. Weis, Chairman
Mr. William J. Kross
Mr. Malcolm L. Monroe

House Committee:

Mr. William J. Kross, Chairman
Mr. Charles P. Fenner, Jr.
Dr. Arthur N. Houston

Medical Committee:

Mr. Charles A. Farwell, Chairman
Dr. N. J. Tessitore
Mr. Fred S. Weis
Mr. William J. Kross

Mr. Fred. W. Matthews was re-elected Secretary-Treasurer of the Hospital.

Dr. R. L. Pullen's resignation as Assistant Director of the Hospital was received and accepted. The Board of Administrators voiced their regret because of the departure of Dr. Pullen and expressed their sincere appreciation for the most competent and conscientious services rendered by Dr. Pullen during his term of office.

Administrative
Changes

Doctors J. A. Magne and J. N. Dills were appointed as Assistant Clinical Directors of the Hospital.

Dr. O. P. Daly was appointed Director of Charity Hospital of Louisiana at New Orleans under the Act passed by the Legislature, the appointment being signed by Governor James H. Davis and the Director of the Department of Institutions, Mr. R. L. Pettit.

**Hospital
Buildings**

Richard Milliken Building—At the close of the fiscal year, the Milliken Building remained unoccupied; however, the Board of Administrators were considering proposals for the use of this building as a poliomyelitis center and a hospital for crippled children.

Lapeyre-Miltenberger Building—The lower floor of this building is occupied by the Physical Therapy Department in this Hospital and offers to the patients in the Institution a complete service in all phases of physical therapy.

The upper floors of the building have functioned throughout the year as a convalescent unit, admissions being limited to the reception of patients from within this Hospital. This building is being occupied as a convalescent unit and not as a home for incurables or patients falling within the old age group.

Just prior to the close of the fiscal year, it was found necessary to provide additional dormitory space for graduate nurses. This because of the great difficulty experienced by this Hospital in maintaining even a skeleton crew of graduate nurses. The Board of Administrators authorized, and the Lapeyre-Miltenberger heirs approved, the setting aside of the 5th and 6th floors of this building as housing quarters for graduate nurses employed in the various departments of this Hospital. Hospital authorities hope this will assist in maintaining a stabilized group of graduate nurses for use within the Institution.

A small occupational therapy room has been established in the basement of this building. In this workshop convalescent patients make ashtrays, table and chair sets, and complete sets of doll furniture for children; cedar cabinets, decorated shelves, jewelry boxes, and other items of this sort. We have found that quite a number of patients have a tendency to desert the Hospital before they have been discharged and this workshop has been very valuable in building the morale of convalescent patients. Instructions in metal, wood, and leather crafts occupy the patients' minds and keep them busy. It helps them endure their long days in the Hospital and makes them more cooperative with doctors and nurses.

Delgado Building—This building, which is under contract to the Louisiana State Board of Health, as a venereal disease control hospital, has functioned throughout the year. The State Board of Health reports 1570 cases treated during this fiscal year, for primary and secondary syphilis. These are the patients who are infectious and, of course, they are the ones whom we are most anxious to treat in order that they may be ren-

dered non-infectious. The patients with early latent syphilis might be considered potentially infectious and the patients who are treated for syphilis in pregnancy are treated in order to prevent syphilis in the offspring.

Patients with other venereal diseases are not usually admitted to this unit for treatment of those diseases primarily. For instance, gonorrhea is not usually admitted unless it occurs with some other venereal disease.

Old Female Medical Building—One-half of the lower floor of this building is occupied by the Hospital's printing shop and mimeograph department. In this department, practically all of the printing done for the Institution is carried out, thus effecting a saving of many thousands of dollars annually. At the present time, there are approximately 150 hospital forms in active use in this Hospital. All of these are produced in this department. In addition, thousands of mimeographed letters and other forms are cleared annually through this department of the Hospital.

The remaining portion of the lower floor of this building is occupied by the Dietetic Laboratory. This space is fully equipped with all modern appliances needed for the teaching of dietetics and is used for instruction in our School for Dietitians, as well as in the training of undergraduate student nurses.

The upper two floors of this building are devoted exclusively to the care of infantile paralysis. At the close of the fiscal year, a large number of poliomyelitis cases were being cared for in this department and it was evident that additional space must be provided in the immediate future in order to care for the present heavy increase in poliomyelitis throughout the State of Louisiana and for the possible future development of this dreadful disease. It should be borne in mind that the Charity Hospital Poliomyelitis Center receives practically all of the cases of poliomyelitis or infantile paralysis as it is commonly called, which develop throughout the entire State of Louisiana.

Colored Tuberculosis Building—The lower floor of this building is occupied by the Lung Station, by the X-ray Unit for servicing colored tuberculosis patients; by clinics for tuberculosis cases, and by rooms set aside for pneumotherapy for colored tuberculosis cases. Space on the lower floor has been set aside for use by the Health Department of the City of New Orleans, which has stationed its mobile x-ray unit at this location and numerous x-rays of tuberculosis contacts and suspected cases are handled in this department.

The upper floors of this building are set aside for the exclusive use of colored tuberculosis cases, and these quarters are continually filled and there is always a waiting list of patients who should be cared for without delay as it is most important that treatment be given to these early cases as quickly as possible. Additional

space for colored tuberculosis cases, both in the early phases and in the advanced non-treatable cases is one of the things most needed in the State of Louisiana.

Dibert Memorial Building—This entire building is dedicated to the care of white tuberculosis cases; this building is always filled, and there is a constant waiting list of cases who should be hospitalized.

The Board of Administrators has approved the erection of glass enclosed and screened porches along the entire side of the building facing the Hospital. This will provide a glass enclosed, screened porch on each floor of this building, large enough to permit beds to be moved on these porches which will be steam heated and protected from the weather at all times. These porches will permit our patients to obtain fresh air and at the same time prevent the danger of contamination to other patients which might occur should these individuals be permitted to relax on the hospital grounds.

In addition, the Board of Administrators approved and set aside funds for the installation of a complete ventilating system for the entire Dibert Building, something which has been badly needed and will prove a boon to those unfortunate individuals who are confined to this building.

During the past fiscal year, the Hospital has been able to obtain a complete moving picture service for the patients in this, and in the colored tuberculosis building, and our patients are now able to see in their own wards and from their beds the same picture shows which we see by going to our local theaters.

The Hospital authorities would like to take this occasion to again call attention to the serious need in the State of Louisiana for additional facilities for the care of tuberculosis in all of its phases. This Hospital is set up and operated for acute conditions and the chronic or so-called incurable cases should not be required to be hospitalized in this Institution; however, there is no other place for them to go; consequently, many beds in this Hospital are occupied by hopeless cases, thus depriving early tuberculosis cases of an opportunity for treatment, with the reasonable hope for recovery of a large percentage of these cases. The great need in Louisiana is for additional beds for these chronic cases—the elimination of these chronic cases from hospitals such as this, thus making available all hospital beds to early tuberculosis cases. Hospital authorities believe this to be one of the outstanding needs in the health program of our State.

Louisiana's tragic need for hospitals for chronically ill, advanced tuberculosis cases, places a heavy load on Charity Hospital. Attendants in our Admitting Room are kept over-worked by numbers of patients who are ineligible for treatment here. Beds in hospitals such as this must be kept active in order that they may be used for the acute cases for whom so much can be done. It

is very hard, indeed, to explain to patients falling within the old-age group or the chronic incurable groups that this Hospital can not accept them. Too much emphasis can not be placed upon the need for facilities to take care of these types of patients in the State of Louisiana.

Isolation Building—This building is the only unit in the vicinity dedicated to the care of infectious and contagious diseases, and this department of the hospital has functioned most efficiently throughout the year. Entire renovation and repair of this building was completed during the present fiscal year.

Student Nurses Home—This magnificent building, which is situated in the rear of the Hospital on Claiborne Avenue, is devoted exclusively to the care of under-graduate student nurses and is used as a dormitory, assembly hall and contains classrooms and dining rooms. Because of a large increase in the number of student nurses during the Federal Cadet Nurse program, this building has been continually crowded and the Hospital has had to set aside dormitory space in the main building of the Hospital in order to house our under-graduate student nurses.

Graduate Nurses Home—This building, facing Tulane Avenue, across the street from the Main Building of the Hospital, has continued to serve as a dormitory for use by graduate nurses who are on duty in this Hospital. The building has been filled to capacity all year and there is a constant waiting list of nurses who desire to live on the hospital premises.

The use of this building for this purpose has materially assisted the Hospital in maintaining a skeleton staff of graduate nurses.

Old Ambulance House—The upper floors of this building have been completely renovated and are being used as a dormitory for graduate nurses with one floor set aside for use by the female doctors who are assigned to the resident and intern staff in this Hospital.

Sisters' Home—This building is devoted exclusively to use by the Sisters of Charity who are assigned to this Hospital and contains their living quarters, dining room and chapel for their religious devotion. During the year, the entire chapel has been renovated and repainted.

Main Building—This large, modern building, of which the State and the entire South can be very proud, has functioned throughout the year as a general hospital. Because of limited funds and inability to obtain trained personnel, particularly graduate nurses, we have not been able to place the entire building in full operation as a hospital. However, the wards not devoted to patients' use have been filled by student nurses and by affiliating nurses from approximately twenty-eight other nursing schools, which send their students to this Hospital for special training in departments not available to all nurses' training schools.

Hospital authorities are becoming more and more aware of the absolute necessity of opening additional wards as our patient-load is constantly increasing. Additional operating rooms must be opened as this department of the hospital constitutes the most serious bottleneck in rapidly clearing our patients through the Hospital. Reopening these wards will be most difficult because of lack of available funds and because of the difficulty in obtaining graduate nurses. The need is great and we will make every effort to see that these services are available to our patients as quickly as possible.

The settlement of the main building has become fairly stabilized, and during the past year has been almost of a negligible quantity.

Maintenance crews are constantly on duty throughout this large building and every effort is made to keep this and other buildings on the Hospital grounds in an excellent state of repair and maintenance.

Laundry—This laundry, which is in constant use and is one of the largest laundries in the State of Louisiana, has operated efficiently throughout the year. Some of the mechanical equipment in this laundry had become so badly worn that it was necessary to have it replaced and this was done.

The Hospital wishes to acknowledge the efficient services rendered by Mr. J. L. Felker, Superintendent of this Laundry, who has cooperated with all departments of the Institution and under adverse conditions, shortage of labor, etc., has managed at all times to maintain a constant, steady flow of fresh linen throughout the Hospital.

Warehouse—The present warehouse building is too small for the Hospital's use and the Board of Administrators has approved making available additional warehouse space as a post-war project of this Hospital. The warehouse department of the Hospital has functioned as satisfactorily as possible considering its limited space.

Hospital Garage—The lower floor of this building is set aside as a garage for the housing of the Hospital ambulances and other automotive equipment. During the past year the automotive repair shop was moved to the second floor of this building and a paint room with an air exhaust fan was provided, thus enabling our mechanics to carry out complete paint jobs on automotive equipment belonging to the Hospital. A system of individual periodic inspection of each automotive unit belonging to this Hospital was set up and is being carried out. By this means each unit is taken out of service at certain stated intervals, thoroughly inspected and repaired, and written reports kept on the condition of every piece of automotive equipment owned and operated by the Institution.

Main Powerhouse—This building contains the power plant supplying the entire institution. Also machine

shops, the ice plant, the air conditioning system, and other machines necessary to the operation of an institution as large as this. The Hospital installed a McWilliams Boiler Cleaner on one of the large power units as an experiment and reports from the Engineering Department show a high degree of efficiency. The recommendation has been made and approved for installation of this or similar equipment on the remaining boilers in our power plant.

Maintenance Building—This building can be mentioned only to be condemned. It is a fire hazard, is in bad repair—is totally inadequate and should be torn down and replaced by a modern building with facilities for housing the carpenter shops, repair shops, paint shops, plumbing and electrical repair department and offices for the Engineering and Maintenance Departments of the Hospital. This has been approved by the Board of Administrators as a post-war project for this Hospital.

Automotive Equipment—With few exceptions the automotive equipment in this Institution is practically worn out and obsolete. Near the close of the fiscal year, the Hospital advertised and obtained bids on the purchase of

- 2—1946 Cadillac Ambulances
- 1—1946 Mercury Four Door Sedan
- 1—1946 Ford Four Door Sedan
- 2—1946 Ford Dump Trucks
- 1—Standard Type Truck (Ford)
- 1—Standard Panel Body Ford Truck

This equipment will be delivered some time during the coming fiscal year. Additional equipment is badly needed and should be purchased as soon as it is available.

Department of Medical and Surgical Care—This department is the direct responsibility of the Director of the Hospital and his assistants. This department is responsible for the actual medical and surgical care of all patients seeking treatment within this Hospital, including both the in-patient department and the out-patient department, admitting rooms, and the accident rooms. Once again, the main problem in this department, as in all other departments in this institution, has been the inability of this Hospital to obtain and maintain a complete staff of skilled employees with particular reference to technicians of various sorts and graduate nurses. The graduate nurse problem being by far the most serious individual problem facing this Hospital. Prior to the close of the recent war, this Hospital experienced a critical shortage of doctors; however, shortly after the cessation of hostilities, this condition rapidly changed. This Hospital sent into the armed forces of our Government over 600 doctors, most of whom have returned and all of whom want to complete their medical education which was interrupted by their service in the armed forces of our Government. We are anxious to assist

Patients'
Services

these young men as we realize our responsibility towards them; however, it was, of course, impossible to absorb this large number of physicians immediately. Negotiations with the Veterans Administration were begun during the early fall of 1945 and an agreement was reached and a contract drawn up by the Veterans Administration and presented to us. All parties concerned signed this contract, which briefly called for the payment to this Hospital by the Veterans Administration of \$37.50 per month per veteran physician receiving training. Under the terms of this contract, it was possible for the Hospital to expand its training program and resident physician positions were increased from 96 to 196, preference being given to veterans who were citizens of the State of Louisiana, and who had served in this Institution prior to their service in the recent war. On July 1, 1946, there were 92 interns and 175 resident physicians receiving training in this Institution. Many young doctors are very much disappointed because of our inability to receive them. They have been assured that every effort will be made to afford them an opportunity of completing their training as quickly as the Hospital can assimilate them. With the close of the war, many of our visiting staff returned, and at the present time, the Hospital is amply supplied with membership in both the visiting and resident staffs.

Attention is called to the list of scientific articles published during the past year by members of our Visiting and Resident Staff.

Extensive study in the use of a form of low spinal anesthesia, usually called "saddle-block" anesthesia, as used in obstetrics, has been conducted in this Institution by Doctors John Adriani and Ray Parmley. This anesthesia eliminates body racking pain during childbirth and was developed at Charity Hospital during the past year. The drug used is Nupercaine, an anesthetic which lasts approximately three hours, during which time the patient is conscious and can move about in bed. Unlike caudal anesthesia, which leave a flexible needle sticking in the spine, the "saddle block" has proved simpler, safer, more precise and comfortable. Because this anesthetic is still in the development stage, it has been used here only in normal cases of delivery, and it has proven most satisfactory in its use in several hundred cases. Although this type of anesthesia has been used before, it was only after months of intense research in this Institution that desired results were obtained.

Dr. Adriani and Dr. Parmley presented their findings to the Annual Meeting of the Southern Medical Association in Cincinnati and won first prize at the meeting with photographs illustrating the method used. Our doctors presented their detailed study of this anesthetic to the Association and were highly commended on their work. Since that time, numerous articles in many scientific publications commenting on this form of anesthesia have appeared.

Rather extensive research has been conducted in the Hospital by Dr. Francis Thiberge in the treatment of hayfever. Considerable progress has been made in the treatment of patients suffering with this illness and Dr. Thiberge's findings have attracted wide-spread attention. They were published in the August issue of the Southern Medical Journal.

Psychiatric Unit—This unit, which was established during the previous fiscal year, has functioned through the past fiscal year. There are 87 beds assigned to this unit which has been placed in the center unit, 3rd and 4th floors of the Main Building, with separate wards for the care of male and female, white and colored patients. Acute mental cases are received in this unit and permitted to remain not longer than six weeks. Upon discharge, they are returned to their homes or to the mental hospitals. Consultation rooms are provided for the staff and recreational and training rooms for the patients. The establishment of this unit has been of great service to our patients. It affords special training to our nurses and professional staff. Shortly after placing this unit in operation, it was evident that a unit of this size was far from being sufficient for the demands made upon this Hospital for the care of this unfortunate group of patients. Recommendations have been made and plans are being formulated for the development of a neuro-psychiatric unit capable of caring for approximately 200 patients. The Hospital authorities have no intention of establishing a mental hospital in this Institution. Our main object is to provide space for the reception, diagnosis and preliminary care of acute mental conditions whose study will be limited in this Institution.

The psychiatric unit has provided facilities for the training of doctors, nurses and social work students in this field. This Hospital is now the largest training center in the South for psychiatric social work students. Miss Audrey Sayman, Assistant Professor of Social Work at Tulane University School of Social Work, is doing a splendid job in this field.

Premature Infant Unit—This unit developed as the result of a conference during January 1941 called for the purpose of discussing the care given premature infants of Charity Hospital. For some time prior to this, the mortality in this group of patients had been very high—at times over 70% mortality. Normally mortality is high in this group of patients, but any mortality rate of over 30% is regarded as too high. The unit was organized and was in complete operation by the close of 1944. During 1945, twenty-eight Gordon-Armstrong incubators and six Henderson Resuscitators and four Printz Suction machines were purchased and installed. In addition, facilities were installed for the correct washing of hands by attendants in charge of these babies. The establishment and operation of this unit has been amply justified by the results obtained. Mortality statistics among premature infants in this Hospital are now well below the 30% level and at the close of the present fiscal year

**Departmental
Units**

plans were being formulated for the further development and expansion of this most important unit.

Radiology Department—This department is divided into two sections, the diagnostic section under the supervision of Dr. Leon Menville, and the therapeutic department under the supervision of Dr. Manuel Garcia.

The Hospital, through its diagnostic department, offers complete service to all bed patients in the Hospital. Separate diagnostic equipment is installed in the following departments: Accident Room, Out-Patient Department, Colored Tuberculosis Building, Dibert Tuberculosis Building, Contagious Building and other wards.

The mobile x-ray equipment is available for use throughout the Institution. Complete dental x-ray equipment is provided for the dental clinics and that portion of the Hospital devoted to that class of cases.

The Therapeutic Division, which includes radium therapy and deep x-ray therapy is fully equipped with both deep and superficial therapy machines and the supply of radium and applicators and Radon for implantation is ample for the Hospital's use.

In addition to the directors of these departments, there are other full time radiologists employed by the Hospital and a full complement of resident physicians who are in training in this department. For details of work done in this Department, see statistical report.

Pathology Department—This department is under the supervision of Dr. Emma S. Moss. It is fully equipped and staffed and offers the following services: Diagnostic laboratories of serology, hematology, parasitology, chemistry, bacteriology, as well as the Pasteur Institute, Out-Patient Clinic Department, and Surgical Pathology, and post-mortem examinations. See detailed report by Pathology Department.

The Morgue handles the statistics on all hospital deaths and distributes this information on both within the hospital and to outside agencies, which include local, state, and national boards of health. This division also cooperates with the undertaking establishments and insurance companies in giving information concerning the deceased patient.

Heart Station—This department, under the supervision of Dr. James L. Gouaux, is fully equipped to render complete service to both in-patients and out-patients applying for diagnosis and treatment.

Electroencephalograph Department—This department is under the supervision of Dr. Walker Thompson and is equipped with modern encephalograph and is the only department of this kind functioning in the State of Louisiana. Because of the humidity and heat in New Orleans, it was necessary during the past year to air-condition this department.

Lung Station—This department for the study and evaluation of lung function, and as a preliminary study for operative cases, is under the supervision of Dr. John Seabury. Because of the heat and humidity which affected the delicate instruments used in this department, it was necessary to air condition this department, also. This was made possible through the generosity of Mr. S. W. Labrot, to whom the Hospital wishes to express appreciation.

Chest Survey for Tuberculosis—Through the cooperation of the Louisiana State Board of Health, equipment has been installed for x-ray studies of all ambulatory patients who apply for treatment of any kind. This is done by means of 70 mm. rapid action x-ray equipment and for the first time will afford a study of thousands of individuals, which will represent a cross-section of our population. The studies during the past year have been rather revealing as a number of incipient or unknown cases of tuberculosis have been picked up, as well as many other conditions. These patients are then referred for appropriate treatment.

Blood Bank—The blood bank has functioned satisfactorily throughout the year. This department is run on the principle of a commercial bank in that various services are given credit for the amount of blood and plasma collected by the services and credited their account and their account is charged with all transfusion units which are issued to that particular department. The various services are required by the blood bank to maintain at all times a working supply of whole blood and plasma and it is the responsibility of the intern and resident assigned to the various services throughout the Hospital to obtain sufficient donors in order that the needs of the patients confined on their service may be adequately met.

During the past year, the mobile unit, donated to this Hospital by the American Legion and the Legion Auxiliary, has made seventeen calls to various sections of the State of Louisiana. When this unit was donated to the Hospital, there was a grave need for plasma, which, at that time, was being extensively used. More and more dependence is now being placed on the use of whole blood and plasma is, comparatively speaking, seldom used. The Hospital seriously questions the necessity of continued use of this equipment as apparently interest in this project has diminished rapidly throughout the State.

Poliomyelitis Center—Apparently this disease is on the increase, not only in Louisiana, but through a large portion of the United States. It is becoming increasingly evident that definite plans must be made for the development of the present poliomyelitis unit. This means that a new location must be sought and additional space provided. This Hospital is charged with the responsibility of caring for all of the poliomyelitis cases developing throughout the entire State of Louisiana. While the

quarters presently assigned had, until the close of this past year, proved adequate, there is no question but that additional space will be immediately needed and at the close of the fiscal year plans were going forward to increase the capacity of this unit. We believe this Hospital should develop a complete, well-equipped and spacious unit for reception of poliomyelitis cases as we have no means of knowing what the future may hold and should this Hospital not be ready and prepared, serious consequences will undoubtedly result.

Hospital Library—A library has been established on the first floor of the Main Building, with modern equipment and is under the supervision and care of a trained librarian. This library carries practically all modern surgical and medical journals, as well as many text books on medical and surgical subjects, and, in addition, carries popular magazines and books. The library is intended for use by the professional staff and by the patients confined within the Institution. Mobile books and magazine racks are provided and these are wheeled throughout the wards and patients are permitted to select books or magazines from these carts.

Recreational Facilities—An extensive recreational program has been started at this Hospital. This program includes two weekly motion picture programs showing films for psychiatric patients. These pictures are made possible by donations from the Lambda Tau Sorority of the Isidore Newman School. Motion pictures are also shown every Thursday for patients in the Convalescent Home through the courtesy of the Middle American Institute of Tulane University. In the John Dibert Memorial for tuberculosis patients, monthly parties, with games and refreshments are being held under the supervision of Sister Mary Jame. In addition, moving pictures are regularly shown to our tuberculosis patients. Sister Mary Francis is the Director of this program and she is doing excellent work.

Dietary Department—This department, which is under the supervision of Sister Euphemia, is completely staffed with graduate dietitians and is charged with the responsibility for conducting a recognized school for dietitians. During the past fiscal year, there were nine students enrolled in this school, which is approved by all accrediting agencies.

The main function of this department is, of course, the selection, preparation and serving of food to the patients and to the employees of this institution. During the past year, from 10,000 to 12,000 daily meals were served. It has been most difficult during these days of shortage to obtain many commodities, particularly meat and butter. The advancing cost of food has made it extremely difficult for this department to operate within a budget prepared almost two years previously, and providing proper meals for our patients. Under today's conditions, this has been a most difficult problem.

Approximately 210 persons work in our Dietary De-

partment. All bread and desserts are prepared in our own bakery, which provides approximately 800 loaves of bread per day. From 1000 to 1500 pounds of potatoes are peeled daily, and over 800 gallons of milk are drunk daily.

The School for Dietitians provides complete instructions for students of dietetics. The students learn all various types of dietetics for the many types of diseases which this sub-tropical and winter climate offers. The students work six months in the main kitchen and also spend one month in a private hospital learning private hospital dietetic routine. While working in the baking department, and in the kitchen, the students are expected to develop original recipes of their own. This department also prepares 25 different formulae for children and babies. Fifteen hundred baby bottles per day are prepared and served. The formula room is under the supervision of the Dietary Department; however, it is closely tied in with the premature infant unit, as well as with the other units devoted to baby care. Preparation of food for babies is carried out under sterile technique and physicians' instructions are rigidly carried out.

The past year has been marked by the close of the recent war, followed by a period of adjustment which had only begun to manifest itself at the close of the year. Personnel problems were still among the most serious problems affecting this Institution. The monthly turnover in Hospital personnel during the past year was substantial. This represents a very serious condition as it is both costly and unsatisfactory to be constantly losing employees and hiring new, untrained individuals. The group presenting the gravest problem is the graduate nurse group. The normal complement of graduate nurses previously employed was 600 to 625. At the close of the fiscal year, we had only 223. The main reason for this loss of nurses is the Hospital's inability to meet competitive salaries paid by private institutions and governmental agencies. The opening of the veterans hospital at the lakefront caused the loss of a number of nurses. We are informed plans are being made for the establishment on a lot in the immediate rear of the Hospital of a 1000 bed veteran hospital. This will most assuredly cause a very serious situation as the salaries paid by veterans hospital group are far in excess of those the State of Louisiana can afford to pay.

During the past year, the Board of Administrators was forced to apply to the State Board of Liquidation for \$100,000, this being the maximum amount permitted under the laws of our State, and every economy was necessary in order to complete operations during the fiscal year and remain within the financial limitations imposed upon this Institution.

We would like to call attention to the educational features provided by this Institution which has become one of the largest institutional centers of the State. At the present time, the Hospital has a school for dietitians

General Comments

approved by the American Dietetic Association. This school offers training in this important subject to our southern girls and we hope to be able to assist in overcoming the serious shortage of dietitians which exists throughout the States.

The School for laboratory technicians, which is approved by all accrediting agencies, offers complete training in all phases of the medical laboratory technicians' work.

The School for X-ray technicians, which is likewise an approved school, offers complete training in both the diagnostic and therapeutic branches in radiology.

The School of Anesthesia, an approved school, offers training in anesthesia to graduate nurses. The training program in this school is under the supervision of Dr. John Adriani, an outstanding anesthetist.

Charity Hospital School of Nursing—This is probably the largest school of nursing in the South, with an enrollment of 399, and has, for years, trained many graduate nurses. This school is under the supervision of the Sisters of Charity of St. Vincent de Paul. The statement carried in another section of this report will show the number and qualifications of the faculty members. Some fifteen or sixteen other training schools in Louisiana take advantage of the material offered in this Institution and send their students to Charity Hospital School of Nursing for affiliation and training in these special subjects. The same is true of eighteen schools of nursing outside of the State of Louisiana. By arrangement with the Louisiana State University, it is possible for students in the School of Nursing to take advanced training, and acquire not only a degree in nursing, but a degree in academic work.

The intern and resident physician program, which is in existence in this Hospital, offers post-graduate training to a large number of young doctors who are preparing themselves for the various specialties in medical and surgical work.

In addition to these educational features already reported, and which are carried on exclusively by this Institution, mention must be made of the use of this Hospital and its vast amount of clinical material, by the Medical Department of the Louisiana State University, and those in the Tulane School of Medicine. The students in these two universities are trained throughout their student years in the Charity Hospital. The last two years of their school work are mainly spent in the clinics, wards, operating rooms and amphitheaters of this Institution.

In line with the recommendations of the American Hospital Association that efficient use of volunteer professional direction be given consideration, we employed a director of volunteers, Miss Polly Amis. The employment of this individual is financed by a contribution of

\$1800.00 from the American Women's Volunteer Service. Volunteers in this Hospital perform many tasks, from nurses aides to making bandages and clerical work in the Social Service Department. It is the job of the Director to make an analysis of all volunteer positions, to place the volunteer where she can perform most capably, and to act as liaison officer between the Hospital, department heads, and volunteers. Your Director and the Board of Administrators gratefully acknowledge its indebtedness to the American Women's Volunteer Service and its treasurer, Mrs. Bert A. Flanders.

We wish to express our appreciation to the American Red Cross through its chairman, Mrs. Charles F. Buck, Junior. The Red Cross has accepted the responsibility for making 75,000 surgical dressings each week for the Charity Hospital which will result in a substantial savings to this Institution. We wish to express appreciation of the Director of the Hospital and the Board of Administrators to the American Red Cross for their fine work in this direction.

Charity Hospital Guild—This faithful and loyal group of volunteer workers have continued to function throughout the year and have prepared a large number of dressings to be used in this Institution during this year. Mrs. Warren C. Gilmer retired as President of the Charity Hospital Guild after twelve years of unselfish service to this committee. She was succeeded by Mrs. Charles Chehady, who was appointed to serve out the balance of her term. The Director of the Hospital and the Board of Administrators and the patients in this Institution, wish to express their sincere appreciation to this devoted group of women who have served so long and so faithfully in this Institution, and we particularly desire to express appreciation to Mrs. Warren Gilmer for her many years of service, and our regrets because of her loss to this Institution.

Sisters of Charity—On May 28, 1946, our beloved Sister Stanislaus, who had been Sister Superior in the Hospital for sixty-two years, retired from active service. The Charity Hospital and the State of Louisiana will never be able to repay its indebtedness to Sister Stanislaus for all that she has done to make this Institution the great benefactor of the poor which it is today. Although retired, Sister Stanislaus still remains at the Hospital in an advisory capacity and her great experience, judgment, and counsel is continuing to be felt and to be of benefit to the patients, doctors, and nurses.

Sister Stanislaus has been replaced by Sister Zita, a most capable and cooperative successor. We extend a cordial greeting to Sister Zita and we pledge to her our cooperation in furthering the magnificent work which has been done for so long by the Sisters of Charity of the St. Vincent de Paul Society.

Acknowledgments

The Board of Administrators and the Director of this Hospital wish to express to the Honorable James H. Davis our appreciation for the cordial relations which he has extended to us during his term of service as Governor of the State.

We wish to express appreciation to the Honorable Robert L. Pettit, Director of the Department of Institutions for the cordial relations which have existed between this Hospital and his Department.

The Vice-President and the Director of the Hospital wish to express sincere appreciation to the members of the Board of Administrators of this Hospital who have devoted many hours of their time to this Institution and who have been of the greatest assistance to the Executive Department of this Hospital by means of their advice and counsel.

The Committees appointed by the Vice-President of the Board have conscientiously served throughout the year. They have been willing, at all times, to meet calls made upon them. The Director of the Hospital, particularly, wishes to express his sincere appreciation to all of the members of the Board of Administrators for their sympathetic attitude, and for their understanding of the many problems encountered throughout the year and for their aid and assistance in helping to solve these problems.

Our appreciation is expressed to the Sisters of Charity, who, throughout the year, have continued to labor for the best interests of this Hospital and the patients within it; to the members of the Visiting Staff of doctors and to our residents and interns, we express deep appreciation for their competent devotion to duty and for their willingness to assume the extra burdens which have been placed upon them throughout the year, and to the department heads and all personnel in the Institution, we express our thanks for their cooperation and assistance.

Respectfully submitted,

LOUIS G. RIECKE,
Vice-President,
Board of Administrators,

O. P. DALY, M. D.,
Director
Charity Hospital of Louisiana

Year Closing June 30, 1946

L. A. MILLET, Chief Accountant

CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS
REPORT ON THE COST OF OPERATIONS

Means of Financing

Funds made available for operation for the biennium were as follows:

		Fiscal Year
	1944-45	1945-46
State Appropriation	\$ 3,500,000.00	\$ 3,600,000.00
Transfer from Bond Liquidation Fund	279,872.00	279,464.00
U. S. Federal Grants	121,507.94	100,227.37
Maintenance of Students	5,365.69	3,880.00
State Board of Liquidation	-----	100,000.00
	3,906,745.63	4,083,571.37

Comparative Cost of Operations for the biennium were as follows:

	1944-45	1945-46	Increase
	over	1944-45	
Salaries and Wages	\$ 2,424,009.79	\$ 2,546,585.54	\$ 122,575.75
Food	600,541.60	634,782.27	34,240.67
Drugs and Surgical Supplies	288,671.00	383,248.20	94,577.20
Other Operating Expenses	379,198.60	394,821.18	15,622.58
Repairs and Maintenance Supls.	95,026.44	103,589.04	8,562.60
Totals	3,787,447.43	4,063,026.23	275,578.80

The annual increase in Cost of Operations over a period of four years has been consistent as revealed by the following tabulation.

	Cost of Operation	
	Amount	% Annual Increase
Fiscal Year 1942-43	\$ 2,843,502.19	-----
Fiscal Year 1943-44	3,461,108.38	21.72%
Fiscal Year 1944-45	3,787,447.43	9.43%
Fiscal Year 1945-46	4,063,026.23	7.28%

Comparative cost of caring for patients for the biennium were as follows:

	1944-45	1945-46	Increase
	Number	Percent	
In-Patient			
In-Patient Days	708,094	755,147	47,053 6.65%
Average Cost per Patient Day	\$4.96	\$4.99	.03 .06%

Clinic Patients

Out-Patient Visits	337,450	377,271	39,821	11.80%
Average Cost Per Patient Visit	\$.81	\$.79	\$.02*	.02%*

Capital Outlays	1944-45	1945-46
Out of 1945-46 Appropriation-----		\$ 20,027.00
Out of 1944-45 Appropriation-----	\$ 21,198.00	9,321.19
Out of 1943-44 Appropriation-----	32,724.24	10,161.20
	53,922.24	39,509.39

Patients Accounts Receivable—\$110,367.40

During the year billings against ineligible patients amounted to \$93,597.20, compared with billings amounting to \$113,030.63 during the previous fiscal year.

Total collections for the year amounted to \$54,091.61, compared with \$60,305.18 during the previous fiscal year. It was found necessary to charge off uncollectable accounts in the amount of \$39,829.44 during the year.

Fees paid to Collection Agencies amounted to \$1,029.92.

Inventory—Materials and Supplies—\$140,080.76

Compared with the fiscal year ended June 30, 1945 the Inventory of Operating Supplies and Materials increased \$1,219.86, accounted for as follows:

	Fiscal Year		
	1944-45	1945-46	Increase
Drugs-----	\$ 21,266.94	\$ 22,500.00	\$ 1,233.06
Food and Groceries-----	8,694.46	9,696.30	1,001.84
Household Supplies-----	25,068.98	28,884.37	3,815.39
Office and Multigraph Supplies-----	8,449.36	7,918.97	530.39*
Maintenance Materials & Supplies-----	32,517.02	37,756.52	5,239.50
Surgical Supplies-----	42,864.14	33,324.60	9,539.54*
	138,860.90	140,080.76	1,219.86

Statewide Mobile Unit—Blood Plasma Program

In April, 1945 the State Board of Liquidation made available to the Hospital a sum of \$12,000.00 for the operation of a Statewide Blood Plasma Program. Actual operation of the program started in June, 1945. Of the \$12,000.00 Appropriation, \$6,642.39 was expended for operation of the unit between June 1, 1945 and June 30, 1946, leaving an unexpended balance of \$5,357.61 as of June 30, 1946.

Hospital Income—Not Available for Expenditure

During the fiscal year collections of Miscellaneous Income reverting to the State General Fund amounted to \$143,438.31, compared with \$156,181.01 the previous year; a total of \$299,623.32 for the biennium.

Profits from the Visitor's Food Service Department amounted to \$20,428.37, compared with \$19,902.40 the previous fiscal year, or a total of \$40,330.77 for the biennium. The profits were paid in to the State General Fund.

*-Denotes red figure.

ANNUAL REPORT PERSONNEL DEPARTMENT

August 5, 1946

Dr. O. P. Daly, Director
Charity Hospital of Louisiana
New Orleans, Louisiana

Dear Dr. Daly:

The matter of obtaining personnel for unskilled or semi-skilled positions in this Hospital has become less difficult, but there has been no marked change in the difficulty of obtaining technically skilled employees. This Hospital has continued to experience severe shortages among the Graduate Nurse, Anesthetist, Medical Laboratory Technologist and Pharmacist groups.

Special recruiting rates above the minimums established in the Civil Service Pay Plan have been obtained for many professional classes in order to meet the going rates in this area. These special rates have helped considerably in the matter of obtaining professional help in some classes.

Turnover among Hospital personnel remains high but is considerably below the average for the past year due to the closing of war industries in this city.

There have been numerous requests for reallocations of positions as increased responsibilities have been assumed by various employees. All reasonable requests have been referred to the Civil Service Department for review and most of them have been allowed.

Through a contribution made by the American Women's Volunteer Services, arrangements have been made for the appointment of a Coordinator of Volunteer Workers. During the war, this Hospital was materially aided by the large number of volunteer workers who contributed their services. With the end of the war a definite decline in their number was noticed.

It is hoped that under the direction of the Coordinator it will once again be possible to build up a large group of volunteers in order to supplement the work being done by paid employees.

We thank the Director of this Hospital and its Department Heads for their continued cooperation in the matter of making adjustments as they become necessary in order to counteract shortages in personnel in certain sections.

Respectfully submitted,

VIRGINIA B. WALDO,
Personnel Director.

ANNUAL REPORT

SISTERS DIVISIONS

Dr. O. P. Daly, Director
Charity Hospital of Louisiana
At New Orleans:

The annual report of the Sisters Divisions will be brief since detailed reports of the Dietary, Nursing, Housekeeping and Out-Patient departments which comprise the Sisters Divisions have been submitted separately.

The departments under the management of the Sisters have struggled through another year of difficulties created by the war and by the inadequate finances of the Hospital. In spite of an ever-increasing number of patients requiring care, the Nursing Department this year continued to lose graduate nurses and likewise saw the student body of the School of Nursing reduced in size. Salaries paid to graduate nurses are so much lower than those offered by governmental agencies and most civilian institutions that we cannot hold our graduates or attract others to accept employment here. This has rendered the work of the Sisters very difficult and discouraging. We cannot too strongly recommend that salaries be raised as soon as finances will permit.

Auxiliary workers play an important part in the work of nursing service and in the Housekeeping and Dietary departments. We are very dependent on this group for the general order and cleanliness throughout the hospital. Although these workers have become easier to employ, our salaries are still so low that we feel they are earning scarcely a living wage. Moreover, this condition has cost us the services of many valuable and faithful employees.

Rising costs of food supplies made it impossible for the Dietary Department to keep within its budget this past year. Every effort has been made to supply adequate food service for patients and personnel, and we feel that the Dietary Department has done a good piece of work in spite of conditions. We are happy to report that the School of Dietetics received recognition from the American Dietetic Association who this year approved our internship for dietitians.

In conclusion, we wish to express our deepest appreciation to those who have helped us to carry on the work of the Sisters Divisions during this past year. To each of the Members of the Board of Administrators and to the Administrative Staff of the Hospital, we are gratefully indebted for continued solicitude and understanding.

Respectfully submitted,

SISTER STANISLAUS,
SISTER ZITA

Doctor O. P. Daly, Director,
Charity Hospital of Louisiana at New Orleans:

Gentlemen:

We wish to present the annual report of the Nursing Department for the fiscal year ending June 30, 1946.

NURSING SERVICE DIVISION

The past year which saw the close of the war did not bring to an end the struggle to provide adequate nursing service for patients in the Hospital. Graduate nurses are returning to civilian hospitals in relatively few numbers. Although 173 resigned from our staff to enter military service, we have only 15 veteran nurses on our staff at present. We continue to depend upon student nurses for service to an extent which, we feel, is detrimental to their education and health. Our total graduate nurse staff has decreased to 225 at present.

The continued resignations of graduate nurses have created untold hardships in the various divisions. It is sometimes impossible to replace head nurses for weeks at a time. Meanwhile, the many doctors who have returned from service and entered upon residencies require assistance to carry on their work. Volunteers have dropped off, and we can only repeat that the nursing situation is more critical than it was at any period during the war.

With a beginning salary below that of the Veterans' Administration and other local hospitals, we have had little to offer graduate nurses as an inducement to accept employment here. We are now graduating large groups of students; and if our beginning salary can be increased, we feel that we can employ many of our own young graduates.

We wish to call attention, also, to the fact that the salaries for our auxiliary workers, such as orderlies and ward helpers, are so low that it is difficult to see how these workers maintain themselves in view of the extremely high living expenses.

NURSING EDUCATION

Admissions and Graduations

We again admitted two classes to the School of Nursing during this past year, one in August and the second in February. The August 1945 class was the last group of students to be admitted into the United States Nurse Cadet Corps. According to the United Public Health Service regulations, all cadets in the school can be carried through to graduation, but no additional students may be admitted to the Corps.

The discontinuance of the Cadet Corps, with its allowances covering most of the financial obligations of the students, took its toll in the number of students applying for the February 1946 class. A quota of 120 students was set, but we succeeded in recruiting only 58. Although the hospital made available a sum of money for loans to help defray the entrance fees of students, this did not suffice to attract the number of girls desired. An extensive recruiting program for the August 1946 class is now underway. The loan fund is still available; and in addition, the hospital has agreed to pay the students of the August 1946 class a stipend of \$10.00 monthly, upon completion of their six-month preclinical period.

The following figures show the changes in statistics for the School of Nursing since last year:

Students in the School of Nursing	1945	1946
Charity Hospital Students.....	448	399
Affiliating Students.....	177	151
Post graduate and Supplementary Students.....	3	9
Anesthesia Students.....	24	34
Students in five year program.....	20	18
Senior Cadets from Other Hospitals.....	6	12

Schools Affiliated With Charity Hospital

School of Nursing

Schools located in State.....	10	10
Schools located out of State.....	19	17
Schools sending Senior Cadets-Out of State.....	4	4

Admissions and Withdrawals

Admissions to School of Nursing.....	230	195
Withdrawals from School of Nursing.....	139	131

Courses Completed

Students Graduated.....	80	110
Anesthesia Students receiving Certificates.....	36	35
Students Receiving Degrees from L. S. U.		
Department of Nursing Education.....	1	14

Clinical Instruction

A clinical instruction, or organized ward teaching program, is now functioning on general medicine, general surgery, gynecology, orthopedics, pediatrics, obstetrics, and in the operating room, Physical Therapy, and Dietary Departments. The program has not been worked out completely in other divisions where students are on duty, but we hope that when clinical instructors become available it will be possible to appoint full-time instructors in more divisions. This program has been of the greatest importance because it provided instruction for students at the bedside, where they so often need help in applying the principles of good nursing care.

Guidance Program

Guidance of students is an inseparable function of nursing school administration and has been carried on as long as our school has been in existence; however, the need for a more formal and organized program of student counseling increased as the student body doubled, and then tripled itself in size. In July 1945, a full-time student adviser was added to the faculty with the status of Assistant Director of the School of Nursing.

Individualization of students, the establishment of a system of warnings issued on slips which vary in color according to seriousness of offenses, and efforts to offset the large number of withdrawals among students, have claimed most of her attention during her first year of employment.

Organization of Faculty Association

In an attempt to coordinate the activities of all concerned with the administration of nursing service and the teaching and supervision of students, an association, known as the "Faculty Association," was formed in the fall of 1945. Active membership includes those in teaching, administrative, or supervisory positions; associate membership is open to general staff nurses.

A board of directors guides the association, which works chiefly through the following committees:

Executive Committee
Committee on Admissions
Committee on Curriculum
Committee on Student Welfare
Committee on Staff Education
Committee on Extra-professional Activities
(of the Faculty)
Committee on Clinical Instruction
Committee on Nursing Arts
Committee on Publicity

Meetings of the association are held twice monthly. One meeting is devoted to business at which the members hear reports from committee chairmen, discuss problems and pending policies, and have the opportunity to present any question or recommendation they wish to have studied or settled.

The second meeting is educational and includes a program presented by one of the committees. As one of the phases of the staff education program this year, several program meetings were devoted to a discussion of the social and health aspects of nursing.

The association provides a medium for exchange of ideas and for dissemination of information. It also promotes good fellowship through social functions sponsored by the association.

Acknowledgements

Despite the difficulties of the past year, we are not unmindful of the sympathetic understanding of our critical situations on the part of the hospital Administrative Staff. We are grateful for the interest always displayed by Board members and Dr. Daly in our efforts to improve our department, and for the cooperation of other department heads and personnel. Our thanks go, likewise, to those who have contributed to the educational and health programs of our school of nursing. And, finally, we wish to express our deepest appreciation to our own personnel for their loyal service during this trying year.

Respectfully submitted,

SISTER HENRIETTA, R. N., Director
School of Nursing and Nursing Service

**ANNUAL REPORT FOR THE OUT-PATIENT
DEPARTMENT**

For Fiscal Year 1945-1946

Submitted by: **SISTER IGNATIA, R. N., B. S.**
Director, Out-Patient Department

Doctor O. P. Daly, Director
Charity Hospital of Louisiana
At New Orleans

July 15, 1946

Dear Sir:

I herewith submit the Annual Report of the Out-Patient Department for the fiscal year beginning July 1, 1945 and ending June 30, 1946.

We have had a steady, daily average increase of patients in the last year and it is a physical impossibility to handle the patient load efficiently.

Staffing Problem

It is not a problem because of shortage of doctors, since we have been fortunate enough to have many of our doctors return, but the employee situation and the lack of space for the accommodation of both doctors and patients is acute. This, of course, could be eliminated by the re-opening of the white wing of the clinics. On July 1, 1942 the entire Out-Patient Department was closed for one month. When it was re-opened on July 30, 1942 only the colored wing was opened. We could not have staffed the entire department during the war, but we are in hopes of being able to do so before too long a time. Of course, it is reasonable to expect that it may be necessary to increase beginning salaries in order to obtain additional personnel.

Space Problem

The over-crowded situation of various clinics at the present time is most unsatisfactory. Space which can comfortably accommodate 200 patients is being used some days for 550 patients or more. Space which likewise accommodates 65 patients comfortably is being occupied by 125 patients. This surely does not make for good patient care. Neither is it a physical possibility for a doctor to work six or seven hours in clinic, care for his patients on the wards and answer night calls. It should not be expected of the lower paid employee to work from 7:30 in the morning until 4:00 in the evening with only ten or fifteen minutes for lunch.

Equipment

If the re-opening of the white clinics is considered, there is need for replacement of some equipment. When we occupied the entire clinic there were Dental Units purchased for the white wing only. The old units were used on the colored side but during the past three years it has been necessary to use the new equipment. It is very doubtful if the old dental units can be used at all.

During these past three years we were ordered to give other departments some of our stored-away equipment which now will have to be replaced; this includes chairs for patients' waiting rooms, electric fans and gooseneck lamps.

New files are needed for the clinic appointment office. There has been a very acute need of suction equipment installed in our Ear, Nose and Throat Clinic. We are, likewise, in need of at least three cases of trial lenses for Eye Clinic. There is need for considerable plastering and painting on the entire white clinic wing.

During the past year we opened in conjunction with our Colored Pneumothorax Clinic, an Eye, Ear, Nose and Throat, Bronchoscopy and Dental Clinic for white and colored tubercular patients. We are still operating a white Pneumothorax Clinic on fourth floor in Dibert Unit and Colored Pneumothorax Clinic on first floor in Colored Tubercular Building.

On some occasions, because of congestion, due to the lack of space in the Dibert it was thought advisable that the entire clinic be placed on the first floor in the Colored Tubercular Building. This would give satisfaction from the nursing angle for there is available the same necessary X-ray and Fluoroscopic equipment in the Colored Clinic as in the Dibert.

If the above is considered, we would need the additional space on the first floor that is now being used by the X-ray Trailer Unit. This would require very little repair work. By using this space the entire set-up could be made into a complete Tubercular Clinic. Also, this would be fully equipped for the various clinics for which we now need to treat the Tubercular out-patients.

Shelter

We are still very much in need of the outside shelter for waiting clinic patients.

Special Clinics

All the special clinics have been re-opened with the exception of the Health Unit for Employees; in addition, we have opened a Plastic Surgery Clinic 5/6/46.

The doctors felt it was advisable to combine the Special Medical Clinics into General Medicine which has been done.

The Independent Unit has re-staffed their Pediatric, Eye, Ear, Nose and Throat Clinics which have been installed by the L. S. U. and the Tulane Units during the war.

The Department wishes to express gratitude to our Director, Doctor O. P. Daly, and the Assistant Director, Doctor R. L. Pullen, to the Board of Administrators, to the Medical Staff, both house and visiting, for their splendid service and cooperation and to the Record Library, Pathology, and X-ray Departments.

I also wish to express sincere appreciation to my own staff for their loyalty and generous service.

Respectfully submitted,

SISTER IGNATIA, R. N., B. S.,
Director, Out-Patient Department

ANNUAL REPORT OF THE DIETARY DEPARTMENT

July 1, 1945—June 30, 1946

Director and Administrative Dietitian: Sister Euphemia.

Administrative Assistant: Mildred R. Darnell.

Therapeutic Assistant: Madge Myers.

Staff Dietitians:

Betty Ann Arceneaux
 Jeanne L. Arnell
 Mabel Bersuder
 *Johnette Blackledge
 Betty Blauert
 Agnes Blazek
 *Kathleen C. Broderick

*Wilma Hawkins
 *Mary Lou Hinson
 Annette Lahr
 *Marilyn L. Larson
 Barbara Ann McCurry
 Jeanne M. Reid
 Arlowin W. Wall

* Resigned.

Dr. O. P. Daly, Director
 Charity Hospital of Louisiana
 At New Orleans

Dear Sir:

The Annual Report of the Dietary Department for the fiscal year beginning July 1, 1945 and ending June 30, 1946, is herewith respectfully submitted:

Activities and Accomplishments

Seven dietitian interns completed their year's work in the second class at Charity Hospital on June 30, 1946. Three of these dietitians will remain to fill vacancies on the dietary staff.

Permission was granted by the American Dietetic Association for a future enrollment of fourteen interns. The course has been improved throughout the year, with increasing cooperation from medical schools, hospital staff, and the dietary staff itself.

The Nutrition Clinic contacted a total of 14,511 patients in the Out-patient Department from July 1, 1945 through June 30, 1946.

The patient meals served during this year show a considerable increase. Personnel meals have decreased. Comparative figures follow:

	1944-1945	1945-1946
Personnel Meals	1,510,776	1,461,455
Patient Meals	2,167,920	2,293,444
Delgado Building Meals	58,594	104,040
TOTAL MEALS	3,737,290	3,858,939

This total includes 35,730 Infant
 Formulae

Total Special Diets Served..... 293,403 302,040

Mr. Milton E. Kossack, assisted by Mr. Charles Miramon and Mr. Joseph Richard, of the City Health Department, conducted food handlers classes for dietary department employees this year. Attendance was compulsory and the classes were profitable to the Hospital and enjoyed by the employees.

The Department also cooperated with the Famine Emergency Program in conservation of scarce foods, with very substantial savings. Pledges were also signed to stimulate conservation in employees' homes.

Recommendations

The system of regulating and recording personnel meals in the Hospital is inadequate, and we feel that correction should be made.

We recommend that meal tickets be collected at all dining room entrances, including the doctors' dining room. Collection should be done by an accounting office employee. If guests are to be admitted, they should also have tickets.

We also suggest that a pay cafeteria for employees be seriously considered. Other institutions have proven pay cafeteria and cash meal allowances to be the most satisfactory system of employee feeding.

Appreciation

We wish to thank the Director, The Board of Administrators, and the Medical Staff for all help extended during the year.

Special appreciation is extended to the Purchasing and Accounting Departments who have helped us procure and control our food supply during the unsettled post-war period. The Maintenance Department has also been very helpful in keeping equipment in good condition while replacements were impossible.

We again thank all who helped us in our teaching program for dietitians.

Respectfully submitted,

SISTER EUPHEMIA, Director,
Dietary Department

HOUSEKEEPING DEPARTMENT

Doctor O. P. Daly,
Director, Charity Hospital,
New Orleans

Dear Sir:

The annual report of the Housekeeping Department for the fiscal year beginning July 1, 1945, and ending June 30, 1946, is herewith submitted.

No changes have occurred in the activities of this division during the past year. The adjustments in the work made during the war have been continued in much the same way, and employees have become accustomed to extending their services over larger areas.

Insect extermination continues to be satisfactorily done by contract with the Orkin Exterminating Company. A new method of extermination on beds has been introduced so that beds can be treated more effectively in the wards and do not have to be transported to the fumigating vault for fumigation.

Window washing continues to be done by the National Window Cleaning Company. Wall washing has been very much neglected and most of the walls are badly in need of painting.

About 300 mattresses were renovated and 32 new mattresses were purchased. Pillows are badly needed throughout the hospital, but could not be obtained at this time.

Three hundred fifty new adjustable beds were purchased, most of which were used to replace old beds in the Dibert Building; the remaining number will be used in the Main Building to replace old beds which are not provided with back rests.

In the Salvage Division \$1,700.95 worth of salvage material was sold to salvage dealers.

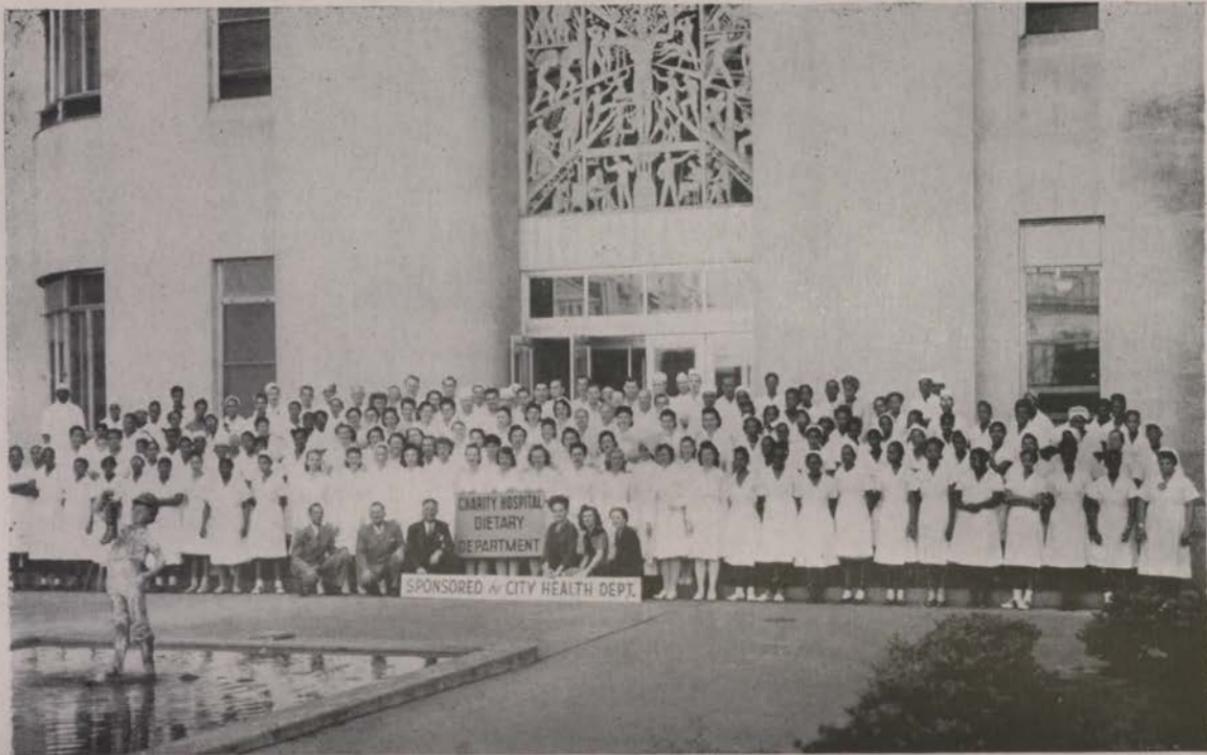

Linen and Sewing Section

The shortage of linen has continued during the past year and it has been difficult to distribute it so as to keep a fairly adequate supply in all divisions. Nearly 10,000 sheets were received, and an additional 1,680 were used to make up garments because it was impossible to get sufficient material by the yard. Efforts have been made to secure patients', doctors', and nurses' gowns ready made, but so far only a few orders have been accepted and delivered. In view of the nation-wide shortage of material and the problem of keeping linen in the Hospital, we believe that a closer system of checking should be introduced and kept up consistently by the hospital guards at the laundry and at all entrances of the hospital. Such a system would not only save the hospital a great deal of money spent for linen, but also for other hospital supplies.

We wish to express our appreciation to Dr. Daly and to the Board of Directors for their generous assistance during the past year. We gratefully acknowledge also the interest and cooperation we have received from all Department Heads.

Respectfully submitted,

SISTER CLARISSE,
Director of Housekeeping

Food Handlers' School sponsored by City Health Department

REPORT OF THE SOCIAL SERVICE DEPARTMENT**July 1, 1945—June 30, 1946**

Dr. O. P. Daly, Director,
Charity Hospital of Louisiana,
New Orleans, La.

Dear Sir:

Staff

During the year staff turnover increased over the previous fiscal year. For the year ending June, 1945 there were 14 resignations and 4 requests for leave while for the year ending June, 1946 there were 24 resignations and two requests for leave.

In the professional staff there were 19 resignations and 19 replacements but with vacancies pending from previous years the department ended the year with 4 vacancies in the professional staff. During the year vacancies in the professional staff averaged from 4 to 9 positions. At the end of the year there were no vacancies in the non-professional staff.

Work of the Department

There has been no change in the function of the department which has continued to provide case work services to patients under treatment in Charity Hospital wards, clinics, accident and admitting departments, and to determine eligibility for free medical care. However, in the case work services division there was a change in emphasis on certain services in relation to requests made by the medical staff.

Case Work Services

Because of turnover in staff it was not possible to continue the further breakdown of services into Tulane and LSU. It even became necessary to divide another service, Metabolic, among the supervisory staff with the result that the Metabolic Service, Genito-Urinary, Special Therapy and Dermatology were handled entirely by the supervisors.

Throughout the year the services were assigned as follows:

- 1 worker—Obstetrics—Tulane, LSU and Independent—Wards and Clinics, White and Colored.
- 1 worker—Eye and ENT—Tulane, LSU and Independent—Wards and Clinics, White and Colored.
- 1 worker—Orthopedic—Tulane.
- 1 worker—Orthopedic—LSU.
- 1 worker—Pediatrics and Contagious—Tulane, LSU and Independent—Wards and Clinics—White and Colored.
- 1 worker—Tuberculosis—Tulane.
- 1 worker—Tuberculosis—LSU.
- 1 worker—Tumor—all patients with cancer throughout the Hospital.
- 1 worker—Female Surgery and Gynecology—Tulane, LSU and Independent—Wards and Clinics—White and Colored.
- 1 worker—Male Surgery, Vascular and Dental—Tulane, LSU and Independent—Wards and Clinics—White and Colored.

1 worker—Neurological—LSU—Wards and Clinics—White and Colored.

3 workers—Medicine, Cardiac and Allergy—Tulane, LSU and Independent—Wards and Clinics—White and Colored.

2 workers—Admitting and Accident Departments—White and Colored.

1 supervisor—Genito-Urinary—Tulane, LSU and Independent—Wards and Clinics—White and Colored; Metabolic Service.

1 supervisor—Dermatology and Special Therapy—Tulane—Wards and Clinics—White and Colored; case work services to employees.

1 supervisor—Dermatology and Special Therapy—LSU—Wards and Clinics—White and Colored.

Director—Neurological—Tulane—Wards and Clinics—White and Colored.

The service assignments were divided among the supervisors as follows:

Louise Goetter

Hospital Intake Unit
Pediatrics and Contagious
Genito-Urinary
Metabolic
Tumor

Marigayle H. Hart

Male Surgery, Vascular and Dental
Tulane Tuberculosis
LSU Tuberculosis
LSU Neurological
Female Surgery and Gynecology

Marguerite Ayala

Obstetrics
Medical, Cardiac and Allergy
LSU Special Therapy and Dermatology

Sister Frances

Tulane Orthopedic
LSU Orthopedic
Tulane Eye and ENT
LSU Eye and ENT
Tulane Special Therapy and Dermatology
Case work services to employees

Louise Meyer

Tulane Neurological

Requests for increased service were made by the Tulane and LSU Psychiatric Units and the Tulane and LSU Pediatrics Units including the premature infant unit. In view of the increasing demand for service, the need for psychiatric social workers on the staff became more and more apparent.

Case Load

During the year the workers and supervisors handled 33,616 cases or an average of 2718 a month:

July, 1945	3195
August, 1945	3074
September, 1945	2857
October, 1945	2803
November, 1945	2425
December, 1945	2134
January, 1946	2323
February, 1946	2390
March, 1946	2878
April, 1946	3190
May, 1946	3561
June, 1946	2786
Total	33,616

The case load continues to fluctuate in proportion, it is believed, although it cannot be definitely proved, to the number of workers on the staff.

During the year there was a total of 43,976 contacts with patients or members of the family. During the last three months of the fiscal year an attempt was made to keep a statistical count of the number of patients interviewed. It was realized that the count would not be strictly accurate but would give an index of the volume. During April, May and June 33,737 patients were interviewed in the three offices and 11,448 telephone calls were answered. This does not include the telephone calls received in the main office.

Admitting Program

This is the fourth year of the operation of the social admitting program. The following table shows the work of the Hospital Intake Unit for the past fiscal year in terms of the number of patients interviewed and number found ineligible as well as the per cent found ineligible:

Month	Number of Patients Interviewed	Number of Patients Ineligible	Per Cent Ineligible
July, 1945	1020	390	38
August, 1945	1266	528	41
September, 1945	1161	361	31
October, 1945	1603	425	22
November, 1945	1595	371	23
December, 1945	1302	258	19
January, 1946	1189	270	23
February, 1946	1326	347	26
March, 1946	1687	428	25
April, 1946	1585	371	23
May, 1946	1752	464	26
June, 1946	1799	433	24
TOTAL	17,285	4,646	27

A second table shows the number found ineligible in relation to the total number of patients under treatment. The two percentages give an entirely different picture of the number of ineligible patients for the number of patients five interviewers can interview is small compared to the number of patients receiving treatment:

	No. of Patients Treated	No. of Patients Interviewed	No. of Patients Ineligible	Per Cent Ineligible
Wards	46,949	3473	750	1½
Clinics	59,300	2597	1454	2
Accident Room	76,133	11,215	2442	3
TOTAL	182,382	17,285	4646	2½

The percentage of ineligible patients has dropped for the first time in four years:

1942-43—12%
1943-44—28%
1944-45—38%
1945-46—27%

This is understandable in view of the termination of war industries, resulting unemployment and lowering of the wage scale. It will be interesting to see if during the coming year the percentage levels off, decreases or increases.

Considering the percentage on the basis of the number of patients under treatment, a drop in the number of ineligible patients is again noted for the first time in four years:

Year	Total No. of Patients Under Treatment	Per Cent Ineligible
1942-43	137,157	2
1943-44	150,685	3
1944-45	159,409	3½
1945-46	182,382	2½

As the number of patients under treatment between 1943-44 and 1945-46 has markedly increased and as the number of ineligible patients has remained approximately unchanged, the percentage of ineligible patients was of necessity smaller as shown by the following table:

Year	No. of Patients Treated	No. of Patients Ineligible	Per Cent Ineligible
1943-44	150,685	4932	3
1944-45	182,382	4646	2½

Therefore it is not believed that the number of ineligible is necessarily growing smaller because of the end of the war but that the percentage is smaller because of the larger number of patients now under treatment.

During the year 13 ineligible patients were admitted because of lack of accommodations in private hospitals. This was a drop in the number of such patients admitted. During each of the two preceding years 22 such patients were admitted.

Student Training Program

Thirty-nine students from the Tulane School of Social Work were placed in the department during the summer, fall and spring semesters. Twenty-two of these were medical social work and 17 psychiatric social work students. This was the largest number of students ever placed in the department and was the result in part of the fact that a psychiatric social work training unit was established during the fall semester when LaGarde General Hospital was closed.

STAFF DEVELOPMENT

Supervisors' Meetings

Weekly supervisors' meetings were devoted to discussions of methods of orienting new workers in the Social Service Department and methods of planning supervisory conferences with new workers.

Staff Meetings

Staff meetings were held every other week with alternating business and program meetings. Program meetings included discussions of the psychosomatic aspects of medicine led by members of the resident and visiting staff and by members of the Social Service Department.

Teaching

Besides participation in the teaching program of the Tulane School of Social Work, workers and supervisors took part in the teaching program of the School of Nursing, LSU School of Social Work, Tulane and LSU Schools of Medicine, the latter particularly in relation to psychiatry, preventive medicine and pediatrics.

Convalescent Care Study

At the request of the National Foundation for Crippled Children, for a three months period in the fall the department gathered statistics on children in the department caseload as well as those not known to Social Service but under treatment in Charity Hospital ward, clinic or accident department, who were in need of convalescent care.

Extramural Responsibilities

A member of the supervisory staff was chairman of the Program Committee of the State Conference of Social Welfare. The director conducted a course entitled Public Health and Medical Care during the summer session of the Tulane School of Social Work. The department was represented on numerous committees of the Council of Social Agencies and other community groups. Members participated in interpreting community chest needs and the relief needs of the state to civic groups in New Orleans.

EXPENDITURES

The following shows the disbursements of the Social Service Department for the past fiscal year:

Patients' Fund	\$ 322.96
Transportation—Patients	780.83
Transportation—Employees	16.29
Sundry	1563.50
	\$2683.58

Patients' Fund**Transportation:**

Paid by Patients.....	\$ 199.04
-----------------------	-----------

Sundry:

Room and Board	33.00
Shoes and Repairs	55.53
Medication	3.18
Glasses	6.00
Refunds	21.69
Surgical Appliances and Supplies.....	4.52
	\$ 322.96

Paid by Social Service Department

Transportation:

Patients	\$ 780.83
Employees	16.29

Sundry:

Medication	\$ 331.99
Shoes and Repairs	60.92
Telegrams	50.29
Surgical Appliances	215.92
Cellulose	7.30
Room and Board	712.42
Car Tokens	70.00
Glasses	17.20
Carfare	2.63
Stamps	10.54
Express Charges72
Postage—Collect44
Government Post Cards	5.00
Baggage Charges31
Tire Repair75
Loan	20.00
Food	29.15
Taxi	6.26
Dental Work	7.00
Fuel	2.00
Clothes	13.41
Book25
Trudeau Memorial Guild	5.00

	\$1563.50

Car Tokens

\$2683.58

The following table shows the number of car tokens given to patients during the fiscal year, 1945-46:

Number of Tokens	Amount
971	\$67.97

The number of car tokens issued increased by 271 during the fiscal year.

Dressings

By supplying gauze and adhesive for dressings and by arranging for nursing service from the City Department of Health, it is often possible to discharge patients from the hospital earlier than would otherwise be feasible. This enables the hospital to begin treatment of another patient.

The following table shows the amount of gauze, adhesive and bandage given patients during the fiscal year:

Amount of Gauze	Amount of Adhesive	Amount of Bandage
511	73	25

The number of dressings supplied patients has shown an increase since the last fiscal year.

FUNDS

Patients' Welfare Fund

The following table shows the expenditures from the Patients' Welfare Fund for the year:

	Number of Patients	Amount Expended
White Patients	92	\$ 658.64
Colored Patients	222	974.41
TOTAL	314	\$1633.05

Compared with expenditures for previous years the number of patients helped has increased while the expenditures, although more than 1943-44, is less than 1944-45. This decrease is probably due to increased use of other funds as well as the fact that several new funds were available.

In September, 1945 a thesis on the Patients' Welfare Fund was completed. The study was undertaken to learn something of the value of a medical relief fund in a public hospital. Requests for the use of the Fund during 1944 were made solely by the Social Service Department and assistance was given through the Fund 144 times with a total of \$1028.33 being spent. Of this sum, \$799.10 of the total amount was spent to aid 109 patients with maintenance and assistance, the remaining \$229.23 being spent to help 30 patients secure medical, orthopedic or surgical supplies, prosthetic appliances, convalescent care, special diets or occupational therapy material.

Study of the characteristics of the patients assisted by the Fund during 1944 showed the highest incidence to be in the Negro group, 91 or 66% Negroes as compared to 47 or 34% white. The male group had the largest number of recipients and most of the patients fell within the single marital status classification. Thirty-one parishes of the 64 in Louisiana were represented in the group of 144, with Orleans Parish rating the highest number served, this not unexpected because of the location of the hospital. Only five patients were non-residents of Louisiana.

Well Convalescent Fund

This Fund continued to be used infrequently. For the past year it was used as follows:

	Number of Patients	Amount Expended
White Patients	4	\$ 35.00
Colored Patients	18	138.35
TOTAL	22	\$173.35

This is an increase of approximately \$100 over last year. However, since the Fund has been in existence, expenditures have averaged \$350 a year while \$1,038.35 in interest has accumulated. The reason why the Fund is not used more has been the fact that the restrictions imposed when the Fund was given the hospital make it impossible to use the Fund very often. At the suggestion of the Board an attempt will be made to interpret the use of the Fund more broadly but yet within legal requirements.

Special Fund

The remaining \$173.21 was expended for medication through the Patients' Welfare Fund and the Special Fund went out of existence.

Stauffer-Eastwick Fund

The use of the Stauffer-Eastwick Fund which became available in April, 1945 increased. Sixty-one dollars was used for three patients last year and \$374.71 for 21 patients during 1945-46. This fund is available for white patients only who it is likely may be rehabilitated.

Social Justice Fund

This fund was secured from Rabbi Feibleman only when all other possible resources failed. Request of \$20 was made and secured through the Social Justice Fund through Rabbi Feibleman for a 35 year old colored male with Pott's disease, luetic aortitis and aneurysm of the aorta. This money was to provide for the patient, his wife and four children pending securing relief from the Department of Public Welfare.

Insulin Fund

During the year the Insulin Fund was used as follows:

Insulin purchased during period 7/1/45 to 6/30/46.....	\$ 152.58
Patients served	51
Cash Balance as of 6/30/45.....	\$1457.77
Receipts 7/1/45-6/30/46	500.00
Total Credits	\$1957.77
Expenditures 7/1/45-6/30/46	152.58
Cash Balance as of 6/30/46.....	\$1805.19

Special Donation Fund

On 1/25/46 Lorraine Kurzweg, 4132 St. Charles Avenue, a volunteer on the Pediatrics Service, gave \$100 to be used for patients on the Pediatrics Service. This fund was dispensed as follows: A total of \$111.50 was given to eight white patients; \$11.50 of this amount was charged to the Patients' Welfare Fund.

Charity Hospital Guild Fund

When Mrs. W. C. Gilmer resigned as president of the Charity Hospital Guild, the Guild made a donation of \$25 to the Social Service Department to be used as the department saw fit. Mr. Matthews entered the \$25 in his books and it was to be drawn against by the department. The same procedure was used in securing this fund as in using the other funds in that a summary in triplicate was prepared, one copy for Mr. Matthews, one for the case record and one for the Social Service Department general file. The expenditure needed the approval of worker's supervisor only. When the \$25 is expended, a statement showing how it was spent will be sent to Mrs. Gilmer.

Work of Chauffeur

The following table shows the number of trips made by the chauffeur during the fiscal year, 1945-46:

Trips Made by Chauffeur	Total for Fiscal Year
Institutions, NOCH, Shelter Homes	318
Patients' Homes in New Orleans	1163
Coroner's Office	34
Social Agencies	211
Railroad Stations	367
Bus Stations	153
City Ticket Offices	72
New Orleans Public Service	1
Post Office	48
Drug Houses	191
Social Workers on Visits to Patients	72
Social Workers to Social Agencies	49
Optical Companies	39
Ferry	21
Hospital Service Association	9
Sickles Fund	19
Deliver material to Agencies and Doctors	438
City Addresses for Magazines, Crutches, etc.	235
Total	3460

RELATIONSHIPS WITH OTHER AGENCIES**Vocational Rehabilitation**

The division of responsibility between the Vocational Rehabilitation unit in Dibert and the social worker assigned to the tuberculosis unit was worked out satisfactorily.

City Department of Health

Through Dr. Whitney it was possible to arrange for the Sickles Fund to enlarge the number of drugs being carried. A request was made after discussion with doctors in the various clinics so that the drugs considered most urgent could be submitted to Dr. Whitney. All drugs not considered too expensive to carry were added to the list.

American Cancer Society—Louisiana Division

Throughout the year the Cancer Society furnished funds to supply transportation, appliances, medication and shelter to patients with cancer on the recommendation of the social worker assigned to the Tumor Service. Dressing for cancer patients were supplied also by the Society.

Department of Public Welfare

Through the Council of Social Agencies the social service departments of three hospitals in New Orleans and the Department of Public Welfare tried to work out a smoother and more rapid method of handling cases. As one method of effecting this objective the Department of Public Welfare began using a form letter with which to secure medical information.

PROBLEMS

Besides inadequate medical social work staff and no provision for psychiatric social work staff which was badly needed, and no raises in the department, two other difficulties were encountered: lack of facilities for the chronically ill in New Orleans and in the State made planning long drawn out and sometimes impossible for plans to be made for some chronically ill patients. As a result of this lack of facilities, four patients have had to remain in the hospital indefinitely pending a vacancy occurring in the two homes for the chronically ill in New Orleans; the capacity of both is limited. Caring for these patients has meant, of course, that four beds could not be used to treat acutely ill patients. Furthermore their care in a hospital for the acutely ill cost the State more than care would have cost had there been State provision for the chronically ill. These four patients are cited as an example of the problem of the care of the chronically ill and as an illustration of the need for State provision for the chronically ill. This illustration does not take into account the care provided by the hospital in many other cases for two, three or four months and longer while plans were being completed.

The other difficulty is the lack of adequate treatment facilities in New Orleans for the mentally ill. As the psychiatric unit is not large enough to meet the demands for emergency cases of mental illness with hopeful prognoses and as the City Hospital for Mental Diseases is not equipped to handle treatable cases there is at all times a waiting list for admission to the psychiatric unit. This means that much time is spent trying to work out plans at home for the temporary care of potential suicides and potentially homicidal mothers with young children. Adequate facilities for the treatment of the mentally ill and chronically ill are needed badly and acutely affect the work of the department.

Respectfully submitted,

LOUISE MEYER,

Director, Social Service Department

REPORT OF THE DEPARTMENT OF PATHOLOGY

July 30, 1946

Dr. O. P. Daly, Director
Charity Hospital of Louisiana
New Orleans, Louisiana

Gentlemen:

I herewith submit the annual report of the Department of Pathology of Charity Hospital at New Orleans for the year closing June 30, 1946.

The Department wishes to express appreciation to the Director, to the Administrative Staff, to the Board of Administrators and to other Departments of the hospital for their cooperation and assistance.

We also wish to express appreciation to our Visiting Staff of Pathologists and Scientists from Tulane University School of Medicine and Louisiana State University School of Medicine for the faithful fulfillment of all responsibilities and obligations.

To my own professional, technical and secretarial staffs I am deeply grateful for their loyalty and untiring devotion to duty.

Respectfully submitted,

EMMA S. MOSS, M. D.,
Director, Department of Pathology

REPORT OF HEART STATION ELECTROCARDIOGRAPHIC LABORATORY

July 1, 1945—June 30, 1946

August 8, 1946

Dr. O. P. Daly, Director,
Charity Hospital,
New Orleans, La.

Dear Sirs:

The accompanying report shows the work done by the Heart Station from July 1, 1945 through June 30, 1946. The figures refer to the number of electrocardiograms in each respective month. Many sound tracings with electrocardiograms and fluoroscopic examinations of the heart were made also in the current year but the breakdown for months is not available, although the data was placed on the patients' records.

REPORT OF ELECTROENCEPHALOGRAPH DEPARTMENT

August 5, 1946

Dr. O. P. Daly, Director,
Charity Hospital of Louisiana,
New Orleans, Louisiana

Dear Dr. Daly:

Below is given a table of the number of Electroencephalograph tracings done per month on both private and charity patients and on adults and children, for the fiscal year July 1, 1945 to July 1, 1946.

During the first seven months of that period, the equipment functioned poorly or else was being repaired. Because of this, no cases were run during October 1945 and only two cases during January 1946. New equipment was finally obtained from the factory on February 15. Since then, throughout the fiscal year the number of cases has been much greater.

43 per cent of the total patients were private patients.

31 per cent of the total were children, 15 years or younger.

	July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May	June
Private patients	2	1	19	0	12	6	0	25	37	32	23	41

WALKER THOMPSON, M. D.,
Director, Electroencephalograph Department

REPORT OF DEPARTMENT OF ANESTHESIA

July 1, 1945—June 30, 1946

August 5, 1946

Dr. O. P. Daly, Director,
Charity Hospital
New Orleans, Louisiana

Dear Dr. Daly:

The activities of the Anesthesia Department have varied little from previous years. The shortage of technical personnel has continued to be acute in spite the return to civilian life of veterans formerly engaged in the administration of anesthetics. Furthermore, the hospital has not been in a position to meet the shortage by recruitment of graduates from its own School of Anesthesia because a marked discrepancy exists between the entrance salary offered and that which private institutions will pay to meet their needs. A similar situation has existed in the Oxygen Therapy Department where white male technicians are employed. The continuous turnover of personnel seriously interferes with the efficiency with which this unit is conducted.

The resident staff has been increased to seven. The increase in the number of physicians on the staff has allowed expansion of the consultation and supervisory functions of the Department. The Department is in a better position to perform various therapeutic blocks for relief of intractable pain and assist in resuscitative and other procedures pertaining to anesthesia and inhalation therapy.

The number of anesthetics administered monthly has been gradually increasing when compared to the number of a given month in the previous four years. Ether, in spite of the innovations and new methods of anesthesia which are constantly being introduced and acclaimed, still continues to be the anesthetic of choice as the following statistics for the past year show.

Ether	426	Pentothal	170
Nitrous oxide-oxygen	100	Local	2742
Nitrous oxide-ether	253	Spinal	1802
Ethylene-oxygen	513	Ammonium Sulphate Block...	7
Ethylene-ether	2713	None	92

JOHN ADRIANI, M. D., Director
Department of Anesthesia

REPORT OF BLOOD PLASMA BANK

Year Closing June 30, 1946

August 5, 1946

Dr. O. P. Daly, Director
Charity Hospital
New Orleans, Louisiana

Dear Dr. Daly:

During the past year the activities of the Blood Bank have differed little from those of the previous year. The total number of transfusions per month has increased steadily. One regrettable feature has been the decline in the number of voluntary workers who has assisted us in the past in the management of the Donors' Station. The trend towards the use of whole blood to the exclusion of plasma has continued. The number of plasma infusions for the treatment of shock and conditions of fluid imbalance is practically negligible. An allotment of 500 units of plasma from the Red Cross has been placed at the disposal of the various services in the hospital to be used in cases of protein deficiencies, nephrosis, and other conditions in which concentrated plasma is indicated.

The mobile unit for the State Wide collection of plasma made three trips since January 1st to outlying communities. In each case the response from the donors was poor. The waning interest of the public in the donation of blood and decreasing demand for plasma cause us to wonder at the advisability of continuing this project any longer.

The control of transfusion reactions is our most difficult problem. It is complicated by a number of factors. The sudden expansion of the population of the house staff during the past six months has complicated the problem because of the diversity of the number of techniques of administering blood and the wide divergence of opinion among individual members of the house staff as to what constitutes a reaction and its classification. The problem will remain a complex one as long as the division of responsibility for the preparation of the equipment for donation and administration of blood remains divided between the Blood Bank and Central Service.

We regretted the loss of Mr. Joseph Stiles who resigned in January. Miss Enix-Boudreux assumed his duties as chief of the laboratory section.

The attached statistical data concerning tests performed and transfusions given covers the period from July 1, 1945 to June 30, 1946.

REPORT POLIOMYELITIS CENTER

July 1, 1945 to June 30, 1946

To date of this report for the year 1946 there have been approximately 185 cases of poliomyelitis reported to the Louisiana State Department of Health—9 cases in January, 6 in March, 4 in April, 12 in May, 36 in June—and 75 in July. (The number reported in July, 1945 was 40.)

From the period of July 1, 1945 to June 30, 1946 a total of 280 cases of poliomyelitis have received care at the Poliomyelitis Center at Charity Hospital. 81.2% of all patients admitted to the Poliomyelitis Center are white; 18.8% are negroes. Further analyses of these cases show that there has been an increase in the incidence of poliomyelitis among the adults since 6% of all cases admitted are 21 years of age or older. 12% of this group were diagnosed as having Bulbar Poliomyelitis.

Poliomyelitis in the acute stage is difficult to diagnose. Of all the cases admitted, and clinical diagnosis established, 18% were found not to have poliomyelitis.

The same obstacles as reported last year in maintaining the Center exist in a greater or less degree—there is still an acute shortage of nurses. Recently salaries have been increased for the personnel at the Poliomyelitis Center, but there are vacancies. Transportation for patients continues to be a problem. Inquiries from all over the state pour in daily, and will continue as the summer days go. The fear of poliomyelitis is growing, although statistics show that even during an epidemic of poliomyelitis in a small community, not over one child in a hundred is likely to suffer serious illness; in large centers of population, such likelihood is still further reduced to one person in a thousand or several thousand.

Through the funds supplied by the Parish Chapters of the National Foundation for Infantile Paralysis, Inc. throughout the state, the Louisiana State Department of Health and Charity Hospital, and in cooperation with Tulane University Medical Center, children from every parish in the state have, at one time or another, received care at the Center since its establishment in 1943.

BRANCH J. AYMOND, M. D.
Director, Poliomyelitis Center
Chief, Crippled Children Services
Louisiana State Board of Health

LUNG STATION

August 5, 1946

Dr. O. P. Daly, Director

The Charity Hospital of Louisiana at New Orleans
New Orleans 13

Gentlemen:

During the fiscal year ending June 30, 1946, the Lung Station was required to restrict its activities for a period of about one month due to delays in delivery of equipment replacement. The studies of pulmonary function on patients under consideration for thoracic surgery have been supplemented by the additional determination of the ventilatory equivalent for each lung and the Efficiency Quotient of each lung when measured against total pulmonary function.

Fifteen asthmatics were carefully studied for objective evidence of the effects of Benadryl on pulmonary function. This study together with a statistical analysis of all tuberculosis patients who have had bronchospirography will form the basis for two papers from the station.

Tabulation of the studies performed in the Lung Station during the year is as follows:

Total number of patients studied.....	96
Bronchospirography	20
Spirography and Spirometry.....	65
Bronchograms	13
Metabolic studies	13
Drug evaluation (asthma)	15
Miscellaneous	3

Respectfully submitted

JOHN H. SEABURY, M. D.
Director, Lung Station

REPORT OF DEPARTMENT OF ALLERGY

July 1, 1945 to June 30, 1946

Dr. O. P. Daly, Director
Charity Hospital
New Orleans, La.

Dear Sir:

During the past year we have administered 4705 treatments equally divided among the whites and colored. We added to those previously treated 113 new patients of which 48 were white. This does not include the numerous consultations given to patients referred to us from practically all the services.

We have always been interested to apply the new discoveries (Bendadryl, Histamine, Prothricin, etc.) in allergy but found them of limited use only, the relief of symptoms lasting only for a short time and have been compelled to depend on the well established hyposensitizing extract for the control of the disease.

Over 15% of our patients free from symptoms report at 1, 2 or 3 months interval for a booster dose to maintain what they term their "cure" but which we class as their control.

We are thankful to our associate, Dr. Henry Ogden, and the resident staff for their invaluable assistance and also to the Druggist, the Nurses, the X-Ray and Pathological Laboratories for their co-operation.

Respectfully submitted,

NARCISSE F. THIBERGE, M. D.
Chief of the Department of Allergy

Arsphenamines Purchased

Bismarsen 0.2 Gm. (Without Solvent).....	2,000 Ampules
Mapharsen 0.04 Gm.....	700 Ampules
Mapharsen 0.06 Gm.....	700 Ampules
Mapharsen 0.6 Gm.....	200 Ampules
Phenarsine Hydrochloride 0.68 Gm.....	800 Ampules
Tryparsamide 1 Gm.....	300 Ampules
Tryparsamide 2 Gm.....	200 Ampules
Tryparsamide 3 Gm.....	400 Ampules

Insulins Purchased

Crystalline Zinc Insulin U-40 10cc	150 Vials
Crystalline Zinc Insulin U-80 10cc	40 Vials
Globin Insulin with Zinc U-80 10cc	288 Vials
Insulin U-40 10cc	1,050 Vials
Insulin U-80 10cc	180 Vials
Protamine Zinc Insulin U-40 10cc	700 Vials
Protamine Zinc Insulin U-80 10cc	200 Vials

Penicillin Purchased

Penicillin Sodium 100,000 units	190,000 Vials
Penicillin Sodium 200,000 units	22,850 Vials

Respectfully submitted,

A. P. LAUVE,
Chief Pharmacist

REPORT OF CHARITY HOSPITAL GUILD

July 1, 1945 to June 30, 1946

Board of Administrators
 Charity Hospital of Louisiana
 At New Orleans
 Gentlemen:

11th July 1946

I gave up the presidency on the 9th of October. Later the Guild held a meeting which I purposely did not attend as I wanted them to do what they wanted to without any regard for my feelings. They decided to run the Guild without any officers and asked Miss Boudreux would she take over as their supervisor. Every one wanted it that way.

I do want to say that Miss Boudreux is doing a wonderful job not only as a supervisor of the Guild but in everything she does.

As I realize this will be the last report I will have anything to do with a sense of sadness comes over me. But I will always have Charity Hospital as my dearest interest outside my own family.

With many thanks and best wishes to each and every one for the many kindnesses you have shown and done for me.

Sincerely,

MRS. C. W. GILMER

Instruction

The instructional program provides the basic tools of learning and is calculated to bring normal opportunities to the hospitalized child. The textbooks are provided by the State Department of Education and are identical with those used in the public and private schools in the State. Because the children are at various grade levels it is possible for the teacher to organize the subject matter and procedure so that each child can progress at the maximum rate of his ability.

Library

Teaching the pupil-patient the use of the books in the classroom library is a basic educational objective. The child develops an enjoyment of reading and a realization of its values to him. At all age levels the children have access to a broad range of easy, well-selected, story-type reading material in keeping with their individual differences.

The following is a report of the money appropriated for the purchase of additional library books during this period:

Class for White Convalescent Children

Allotment for books from State Department of Education.....\$71.50

A fifteen volume set of books, entitled The Chronicles of America, has been donated to the Class through the Yale University Press.

Class for Colored Convalescent Children

Allotment of books from the State Department of Education.....\$65.00

Gifts from Individual Donors.....15.91

Twenty-five books from Zeta Phi Beta Sorority and Friends.

Audio-Visual Aids:

Visual material, including motion pictures, slides, stereographs, and still pictures, further and enrich the learning of the children.

Each week educational and recreational films were shown to the children in the White Class for Convalescents.

On Sunday, November 11, 1945, the Phi Beta Sorority presented the Class for Colored Convalescents with the following Visual Aids Equipment:

Model V Delineascope (Opaque Projector)	\$101.00
Model B Delineascope (Daylight Glass Slide)	77.25
Slide Kit	18.75

A stereoscope and a stereograph were given the Class for Colored Convalescents by the Orleans Parish School Board.

Recreation and Parties

Games, supervision of ambulatory children in outdoor activities, and programs for the bed-bound are methods frequently used in attaining integration of the therapeutic and education program. To these endeavors the following seven members of the American Red Cross give their time each week.

Mrs. H. H. Beard	Mrs. Wm. Slack
Miss Edna Faust	Mrs. R. M. Volkert
Mrs. J. T. Nix	Mrs. J. L. Wagner
Mrs. K. Ruch	

Birthdays, holidays and special occasions were, as usual, celebrated with a party. The following parties were held in the Class for White Convalescents;

Five Birthday Parties.

Halloween Party: Given by Mrs. J. T. Nix and Mrs. Wm. Slack.

Christmas Parties:

Dec. 16—Fourteenth Ward Civic Improvement Association.

Dec. 19—Grey Ladies of the American Red Cross.

Dec. 20—Wives of the Veterans of Foreign Wars.

Dec. 21—Veterans of Foreign Wars.

Dec. 23—Elks, B.P.O.E.

Refreshments and favors were distributed at the following parties which were sponsored by the Grey Ladies of the American Red Cross.

Valentine Day Party.

George Washington's Birthday.

Saint Patrick's Day Party.

Easter Party.

On May 30, 1946, Miss Edna Faust and Mrs. K. Ruch gave a memorial party to all the youngsters on the ninth floor.

July 4th was celebrated with a movie, refreshments, and favors donated by Mrs. J. T. Nix.

At Christmas and Easter the patients in the colored wards and in the Class for Colored Convalescent Children were given refreshments and gifts by the Sunshine Helpers.

We wish to take this means of expressing our appreciation to the Director, the Board of Administrators, Sister Margaret, and the medical and nursing staff for the interest and cooperation extended our department throughout the year.

Respectfully submitted

SELMA L. KLEIN, M.A., Instructor
Class for Convalescents

LIBRARY OF THE
ORLEANS PARISH MEDICAL SOCIETY

MEDICAL AND PATIENTS' LIBRARY

REPORT FOR PERIOD ENDING JUNE 30TH, 1946

The Board of Administrators appropriated out of Trust Funds \$1608.00 for the purchase of periodicals, medical books and recreational reading for the year closing June 30th, 1946 of which there was a balance unexpended at the close of that year of \$602.24. In addition an amount of \$5000.00 was appropriated to be expended annually in amounts of \$1250.00 from July, 1946 to July, 1950.

The Charity Hospital Medical and Patients Library was organized in October, 1945 to provide the patients of the hospital with reading matter, chiefly of a recreational or therapeutic value, but also vocational, educational and informational as requested; and to provide the professional staff of the hospital with material to aid them in their work, including technical books, current periodicals and reprint and pamphlet material and to offer them a reading room for the perusal of this literature. The reading room is located on the First Floor, White Side, Room 13, main building and is used by the professional staff of the hospital, and student nurses. Only the professional staff are allowed borrowing privileges, meaning that they may check books and magazines out of the library. Books are circulated to the patients by means of a book truck and bi-weekly visits are made to the wards.

Because of time entailed in ordering and receiving books, a special loan of 200 books was made from the New Orleans Public Library on December 6, 1945. Some of these books have been exchanged and new titles added. Up to date we have received about 229 books from donations, many of which have come to us through the interest of Mrs. C. W. Gilmer of the Charity Hospital Guild. We also received a donation of 300 children's picture books from Mrs. Anthony Petteleri which have circulated throughout the hospital but are not numbered in our collection. There have also been many donations of pocket books and magazines. To date our book collection numbers 567 volumes of which 338 were purchased. Our total book circulation on the wards and in the library has been 4,733, beginning with a total book circulation of 628 for the month of January and steadily increasing to a total book circulation of 840 in June. As of June 30th the circulation of medical journals to the professional staff has been 494. The attendance in the library since its organization has been approximately 1,600 people. The increases in circulation and attendance show that more people are enjoying the library and taking advantage of the service it provides.

ANITA LOUISE CROZAT
Assistant and Acting Librarian

DONATIONS TO THE DIBERT TUBERCULOSIS BUILDING

July 1, 1945 to June 30, 1946

DONOR—DONATIONS
